WORK EXPERIENCE

Frontend React Developer
Sinecure
02/2021 - present,   *Lahore*
As a frontend engineer at Sinecure, my primary responsibility was to ensure that the user interface of our web applications was visually appealing, user-friendly, and responsive across various devices and screen sizes.
One of the most important aspects of my job was to write clean, efficient, and maintainable code. This involved using modern web development technologies such as HTML, CSS, and JavaScript, as well as popular frontend frameworks such as React and Redux.
In addition to my frontend expertise, I bring excellent knowledge of SQL databases and a strong familiarity with RESTful APIs. This enables me to seamlessly integrate backend functionalities into frontend applications, enhancing the user experience. My adeptness at integrating these skills with React applications further enriches the interactivity and capabilities of the user interfaces I develop.

Business Developer
Sinecure
01/2021 – 08/2021,   *Lahore*
My responsibility is to convince clients and maintain a relationship. I am writing proposals on the Upwork platform related to UI/UX DESIGN AND Front-end development. During this work, I am successful in gaining lots of clients for my freelancer colleagueship will also help me gain knowledge about front-development, which is my initial step to entering into the development field.

Data Entry Operator
Trans data International Company
02/2021 - 11/2021,   *Lahore*
I am working on different campaigns, such as Qualia. Guardians. But my primary responsibility is to work as a Data entry operator and maintain a report management system. Here I am also working as a team leader in the absence of my senior to guide my colleagues and teach them about the new campaign

PERSONAL PROJECTS

Crud System (03/2022 - 06/2022)
▫ It is a team-based task. I am working as a front-end developer, and we develop a system based on instructor detail. The system is on MVC (Model View Controller) in Visual Studio.

E-commerce Store
▫ Developed an E-Commerce store using WordPress. Also, using the principles of search engine optimization.

RDBMS
▫ Worked on Microsoft Access.

Human Resource Management
▫ Research on Rolustech Software Company

Digital Statistics
▫ Worked on SPSS and Anova for creating, modifying and analyzing questionnaires.
